

# Stencil Materials Pricelist

"Stencil Machines for More Than Marking."

(Priced per Roll)

BREN, Inc. 8401 Covington Rd., College Grove, TN 37046

Order via email: sales@breninc.com Phone: 615-368-3418(WorldWide), 800-826-3991(U.S. & Canada) FAX:615-368-3419

In general, a stencil is a thin sheet of material with a shape cut in it and through which ink or paint is applied to mark the shape onto another surface. Stencils have many practical applications and are used frequently in industrial, commercial, artistic, residential, and recreational settings as well as by the military, government and infrastructure management. Stencils are frequently used to quickly and clearly label objects, vehicles and locations. Stencils are easily customized allowing the user to arrange characters, words or symbols specific to the object being marked. Stencils can be graphic images, Symbols, Text, Bar Code information, or any combination of these. They represent an inexpensive and reliable technique for making a permanent marking on almost any surface. BREN has developed stencil materials used in almost any application imaginable. From general purpose to specialized Military Applications. From SMALL CHARACTER stencils, HIGH TEMPERATURE stencils, ADHESIVE BACKED stencils or stencils that have specific MAGNETIC capabilities, whether your need is in the Industrial, Military or Municipal fields or in the Commercial, Home Decorating or Arts & Crafts market we've got it. And, many of our materials can be cut on any standard "vinyl" cutter. If you have a special sizing or capability need contact BREN for more help.

**Ultra-Cut II™** A white, 8.5 mil. Clay-Coat Polyethelene with BREN ultra-removable adhesive on a kraft release liner. Used for stencils where an adhesive helps to hold in place and seal against over-run. 45°/55° blade, 120g. min.force.
